Professional Summary

Product designer based in Kuwait with 14+ years of experience designing responsive web and mobile products. Combines product thinking, UI/UX craft, prototyping, user feedback, and requirements collaboration with hands-on HTML, CSS, and JavaScript implementation.

Core Skills

Design: UI/UX Design, Figma, Adobe Creative Suite, Responsive Web Design

Front end: HTML, CSS, JavaScript, Bootstrap, jQuery

Platforms: SharePoint, Microsoft Power Apps, Microsoft Visual Studio, Microsoft Office

Professional Experience

Diyar United Company

Web / Graphic Designer | June 2015 - Present

- Design UI mockups and prototypes that clarify website behavior, visual direction, and implementation requirements for responsive web and mobile interfaces.
- Identify and resolve UX/UI issues, refining layouts through user and stakeholder feedback to improve usability and consistency.
- Gather and evaluate requirements with the product manager, then translate them into clear interface flows and design solutions.
- Contribute to front-end implementation with HTML, CSS, JavaScript, Bootstrap, and jQuery, helping designs move from concept to production.

Sparkle Events

Web / Graphic Designer | April 2013 - June 2015

- Designed web pages, digital banners, advertisements, and brochures within a Magento CMS environment to support consistent campaigns and content updates.
- Served as the lead technical resource for user experience and interface design, translating requirements into practical web solutions.
- Applied software-development, security, and quality-control standards so design deliverables aligned with organizational practices.

Professional Experience (continued)

Talabat.com

Junior Designer | June 2012 - April 2013

- Created web pages, digital banners, advertisements, and brochures for customer-facing digital campaigns.
- Designed and developed HTML email campaigns for reliable cross-platform rendering.
- Optimized images while preserving visual quality and resolved day-to-day issues with clients and vendors to keep delivery moving.

Selected Project: Hayakom

Lead Product Designer | 2024 | Kuwait Public Authority for Sport

- Led product design for the official Hayakom mobile app, owning discovery architecture and key live match, event, team, player, and booking flows.
- Designed bilingual Arabic and English experiences, including right-to-left layouts, to support clear and consistent navigation in both languages.
- Created reusable interface components and patterns in Figma to align screens and support implementation across the product.
- Worked close to implementation to translate product decisions into production-ready interaction and interface behavior.
- Unified sports information, events, ticketing, and tourism in one coherent official mobile product.

Certification

ITIL 4 Foundation | 2022
